PROGRAM OUTLINE

Course Duration and Schedule

Total program hours	180 hours
Total program length Full-time	6 weeks

The campus determines the start date for this program. Students may only enter the program in the introductory phase as the program is cohort-based.

On-campus courses are scheduled Monday to Friday, with students expected to attend all sessions, which are 6 (six) hours in length. Specific class hours and schedule will be provided by the campus at the time of enrolment.

Brief Course Description

Fire protection system program is developed in consultation with industry experts and is geared to youth and adults who have an interest in working in the fire safety field. Students will be prepared for entry-level jobs such as fire protection technicians, sprinkler system fitter, fire prevention technician, fire alarm operator and fire system installer where demand is high and earning potential is good and have all required safety certifications. Majority of the municipalities need inspection, installation and testing by trained and approved technicians for commercial as well as residential buildings.

Research indicates that between 2019 and 2028, there will be over 23800 job vacancies in the fire and life safety due to retirements and industry growth (<https://www.jobbank.gc.ca/marketreport/outlook-occupation/3301/ca>). Employers must find creative solutions, including hiring entry-level employees and helping them to develop the skills required on the job.

Successful graduates of this program may also explore opportunities to pursue their certifications from ASTTBC in the fire safety and in the related areas.

This program emphasizes a hands-on approach to training, where experience gained in the workshop is focused on industry practice. The necessary theoretical work component is integrated into the program to complement and enhance the practical. Industry tours will expose the student to a variety of work environments. After completing electrical and electronics for fire protection installation and inspection, students learn how to install and test emergency lightning systems; automatic sprinkler and standpipe; fire alarm systems; smoke control; introduction to HVAC systems; various fire suppression systems; introduction

connection control, use scaffolding and access equipment Practical application of theory is demonstrated in shop of our campus. Contained within the program is training towards certification for WHMIS and Standard First Aid CPR/AED Level 1.

Career Occupation

Graduates will be able to work as entry-level employees such as fire alarm system technician, fire extinguisher service technician, emergency lighting system installer, sprinkler and standpipe tester, backflow technician for both the residential and commercial sector. They will have essential safety certifications required for employment and basic skills that will allow them to contribute at a basic level to a variety fire safety projects.

Learning Objectives

Upon completion of this program, students will be trained to work in Fire Protection System Training projects involved in :

- Comply with laws, rules, regulations, and codes and identify those relevant to fire prevention of the authority having jurisdiction.
- Apply basic medical first aid as appropriate to emergency situations likely to be encountered in the workplace.
- Inspect, test, troubleshoot and repair of fire safety equipment.
- To identify the different types and components of sprinkler, standpipe and foam system
- Review residential and commercial sprinkler legislation.
- To identify the different types of non-water based fire suppression system.
- Contribute to the completion of building projects in accordance with industry standards and instructions from supervisors.

Teaching Methods

Course delivery is instructor-led and combines theory lectures with shop demonstrations and practical shop engagement.

- In-class lecture including demonstrations
- Focused course activities
- PowerPoint presentations as applicable
- Application based exercises

Homework Hours

Homework expectation is a minimum of one to three hours per day to support the course learning.

Methods of Student Evaluation
